

2015

JESUITS OF EASTERN AFRICA PROVINCE

[ST. PETER CLAVER ECOLOGICAL TRAINING CENTRE]

2015 PROFILE

Brief History

The Centre was instituted in 2008 with the aim of offering students basic computer, electricity and solar, and basic construction, water and sanitation training. In addition to the technical subjects, all students are trained in Mathematics, Physics, English and Computers. The training are divided into 2 semesters, each lasting months, with 2 months break in between the semesters. The program mainly targets members of the local community offering them both theory and practical training. 18 students completed their course in May of 2015. More than 70 technicians have been trained over the five years of the project.

In addition, the Centre, in collaboration with Archangelo Ali Association (a local NGO running a network of hospitals and health centers in the region) is running a short training program for car mechanics. A Technical Advisor delivers on-

the-job training of two local car-mechanics.

Activities/Projects Implemented

- **Student Graduation:** In May 2015, 18 students (12 from Solar and electricity, 6 from basic Construction, Water and Sanitation)
- **Equipment:** solar powered computers were purchased allowing for energy saving. A total of 82 people (60 male, 22 women) benefited directly from the Centre's program.
